GLOBAL HYGIENE SOLUTIONS

HIDROALCOHOLICO

SANITIZING HYDROALCOHOLIC GEL

FEATURES

Physical aspect: Transparent gel.

Density: 0,88 gr/cc. approx.

pH (as it is): 7 approx.

Composition: Alcohol denat, Aqua, Isopropyl alcohol, Glycerin, Acrylates/C10-C30 alkyl acrylate crosspolymer, Triethanolamine.

Flammable

Professional use only

Contains a blend of isopropyl and n-propanol, (70% v/v alcohol) in gel format, no scent and quick evaporation. Primarily recommended for people who need to guarantee a permanent maximum hygiene for the hands without having to constantly wash them.

PRECAUTIONS

For external use only. Avoid contact with eyes. Keep out of the reach of children. Flammable. Keep the containers tightly closed. Keep away from sources of ignition. No smoking.

NOTES

For professional use only.

PROPERTIES

Perfume free, suitable for use in food processing areas. Gel appearance, higher viscosity provides longer product-skin contact time. It is a product of high germicidal power due to its high alcohol content (70% v/v). The alcoholic solutions offer the advantage of having a faster action, they do not require prior washing nor subsequent hands drying, they have a broad scope and cause less skin irritation.

INSTRUCTIONS FOR USE

To ensure maximum hands hygiene, apply in the palm of a hand a sufficient dose to cover both hands, rub them for 15 seconds covering all areas and wait for complete drying. To hygienise any non-porous area, apply on a cloth and clean it, instant dry. Recommendations on hands hygiene: Remove watches, rings and bracelets; Avoid using artificial nails or nail extensions; Keep nails clean and short; Use only if hands are not visibly soiled or contaminated.

FIELDS OF APPLICATION

Appropriate use in food industries, kitchens, slaughterhouses, veterinaries, hairdressers, funeral homes.
